

How's life on a ship

You know that a life on a ship is happy and sad, It's happy because it's a new experience. And it's sad because you don't have beds, chairs, desks in the bilge. You need to do your necessities in a bucket. The food is bad because you need to grab the food quickly. You only have 4 hours free. And you need to work a lot of hours. For me, life on a ship is a lot of responsibility.

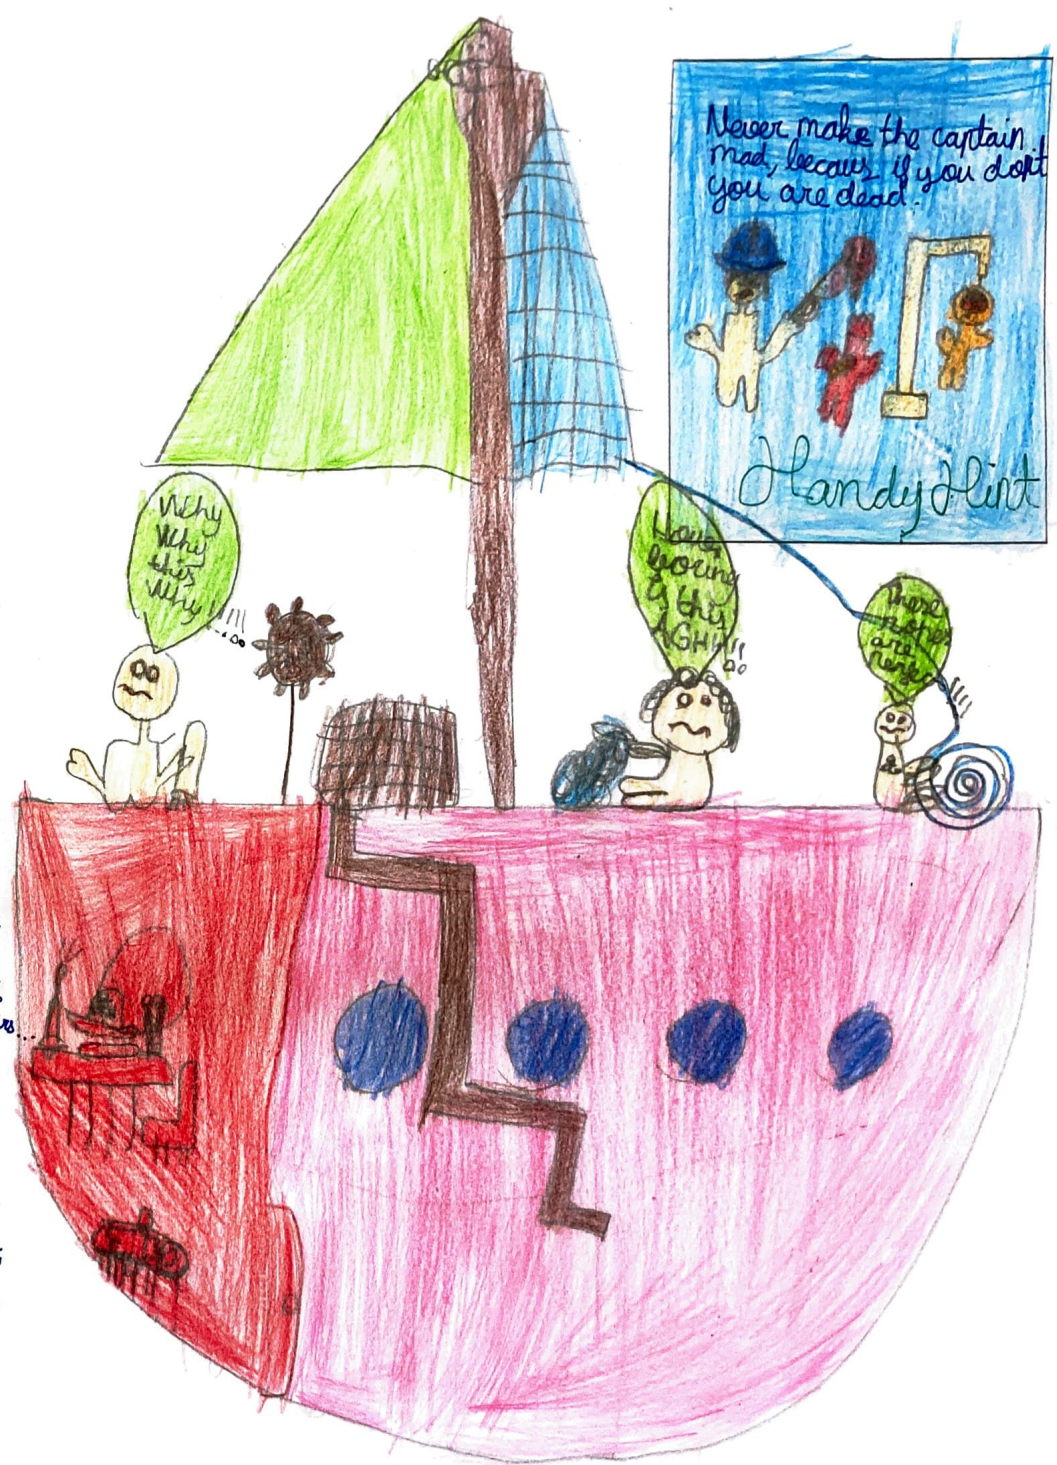

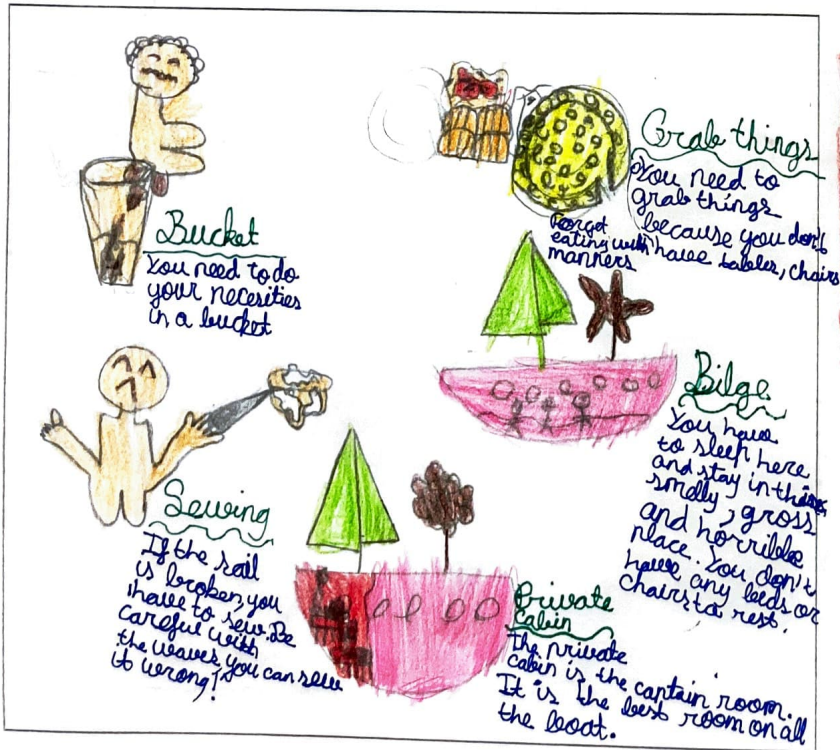

Never make the captain mad, because if you do it you are dead

Handy hint

How's life on a ship

You know that a life on a ship is happy and sad, it's happy because it's a new experience. And it's sad because you don't have beds or chairs or desks in the bilge... you need to do your necessities in a bucket. The food is bad because you need to grab the food quickly. You only have 4 hours free. And you need to work a lot of hours. For me, life on a ship is a lot of responsibility.

Would you want to work in a ship

Here we are one week on the ship. We hate the boat. The captain never goes out of his room so, we can't tell him anything. My parrot Peter is the only one who is allowed to go to the captain's cabin. We only sleep four hours and then work four hours. We eat like animals, except the captain's cabin, but well it is the only thing we have. The toilet is horrible and the shower too.

Main body

use shower with a bucket full of water

In the ship there are a lot of pets.

The toilet is also a bucket and when it is full you throw it in the ocean

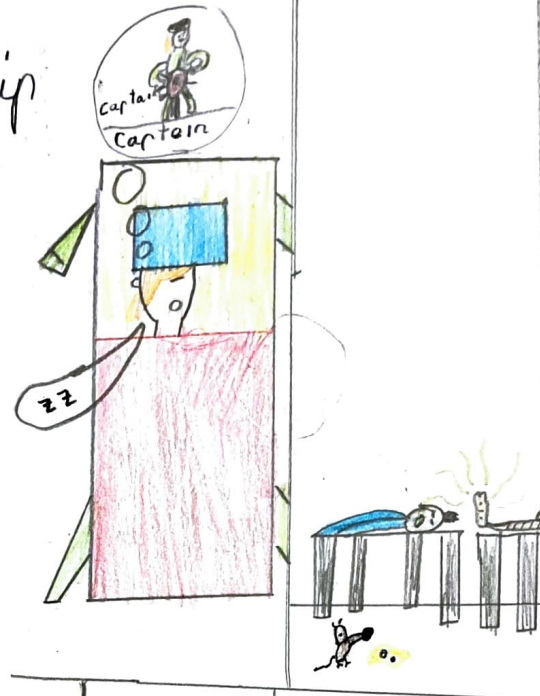

Some of the work is to get the fish out of the barrel.

We sleep in the bilge (it isn't healthy) we sleep on the floor.
